FLOWER

BULBS

LOS ROBLES CO.  
FLOWER BULB  
SPECIALISTS

SANTA CRUZ,  
CALIFORNIA

This is where they grow

## HOW TO FIND US

Operating headquarters and offices, as well as some of our growing fields, are located between Twin Lakes and Del Mar on the EAST CLIFF DRIVE, midway between Santa Cruz and Capitola.

Autos from Watsonville should turn onto Chanticleer Avenue and Seventeenth Avenue to Del Mar, thence to right to East Cliff Drive. Autos from Santa Cruz can take one of many roads to Seabright, thence on East Cliff Drive to our premises.

Here is a map to help you locate yourself:

## VISITORS

Interested visitors are welcome to see us at work. Ours is not a show place, it is only a work shop. WE ARE CLOSED SUNDAYS.

## TERMS

### CASH.

6 bulbs at the dozen rate.

50 at the hundred rate.

We prepay delivery charges.

## REMITTANCES

Customer's personal check preferred and will be customer's receipt. Any other form accepted.

## GUARANTEE

Knowing that our success depends upon the satisfaction given our customers, we guarantee all shipments to reach customers in satisfactory condition and to be true to name.

## DISCLAIMER

Most of the failures with seeds and bulbs are due to causes entirely beyond our control, such as unfavorable weather, too deep or too shallow planting, slugs, etc.; therefore we give no warranty, expressed or implied, as to description, purity, productiveness, or any other matter of any seeds, plants, bulbs, etc., we send out, and will in no way be responsible for the crop; if the purchaser does not accept the goods on these terms they are to be returned at once.

## SHIPPING SEASONS

The shipping seasons are of course dependent upon the range of the planting season. It is advisable to order EARLY and we will deliver as the stock is ready to plant.

## INSPECTION LAWS

All stocks are shipped under the supervision of the inspectors of the County Horticultural Commissioner, subject to final passing by your County Commissioner. All stock shipped is supposed to be free from all insects and disease. In case stock should for any reason be condemned by your Commissioner, we will gladly refund the money. That is all we can do.

## CULTURE OF GLADIOLI

Plant December to May—Blossom time May to September

(Delivery time November to March)

Since the publication of our last catalog, we have added many new patrons and friends, indicating that we will have a larger field this season into which to introduce "THE FLOWERS OF GLADNESS" and the bulbs which "MAKE THE NEW YEAR GLAD."

## GLADIOLI

There is no other flower which will give such great beauty and returns for the small amount of the investment. No flower will grow with so little care and the gladioli is beyond comparison with other flowers as a garden flower, and makes a wonderful decoration for the home when cut. Mass planting and sequence of three weeks between planting brings a continual blooming season in your garden.

## WHERE TO PLANT

You do not have to restrict your plantings in rows or beds. Try planting them among the roses and shrubbery. Mix them in with the zinnias, marigolds and asters, and Halley planted with light blue delphiniums is a wonderful combination.

## WHEN AND HOW TO PLANT

The culture is the easiest of any bulb. Plant in California from December to May (or after frost is past in colder climates) placing the bulbs six inches apart and about three to four inches in depth, in good mellow soil. Avoid excessive fertilizer at planting time, but a little bone flour will aid in growth. Frequent waterings are necessary to keep growth advancing steadily, and do not be afraid to cultivate after watering. The three Rs of good glads are GOOD SOIL, FREQUENT CULTIVATION and PLENTY OF WATER. After flower is through blooming, dispense with watering, cut the spike off near the ground (leaving four leaves) and when thoroughly ripe, lift bulb and store until planting time, in shallow box.

## A HOBBY

Why not put in a bed of gladioli as a hobby?

# GLADIOLI

	Each	Doz.	100
AMERICA—One of the finest light pinks, orchid like in flower.....	\$ .10	\$ .50	\$

Pendleton (10), Schwaben (10), Crimson Glow (10), Gretchen Zang (10), Herada (10), Mrs. Dr. Norton (10), Niagara (10), Lily White (10), Panama (10), Mrs. Watt (10), Prince of Wales (10), Halley (10). A wonderful assortment of 12 Gladioli of great merit.....\$1.00

We can make up any desired collection for you.

100

MEDIUM SIZED (No. 3)  
GLADIOLI BULBS

**\$1.50**

The biggest gladioli seller on the Pacific Coast.

Hundreds of satisfied buyers are recommending it to their friends as the "Best investment ever made."

A mixture of standard varieties of merit, and offered as an advertising medium to interest garden lovers in gladioli.

A fine chance to get started.

For mass planting—all colors mixed. (Does not contain any Primulinum Hybrids.)

100 good medium-sized bulbs.....\$1.50

Half the number ..... 1.00

Post Paid

# MINIATURE GLADIOLI

Plant October-November

Blossom Time May-June

The culture of these Miniature Gladioli is very easy. Plant from October to December and you will be rewarded with wonderful blooms in May and June. Plant the bulbs 6 inches apart and 3 to 4 inches deep. Mass planting is very effective, and in our own growing we often get three or more spikes from one bulb. Accompanying illustration shows one large check of Peach Blossom in bloom. The flowers are borne on long slender stems and are in great demand as cut flowers.

# AGAPANTHUS UMBELLATUS

(Lily of the Nile)

While really a plant, it is often listed under bulbs. The flowers are bright blue, produced in umbels of 20 to 30 on stalks two to three feet tall. A long season bloomer. Evergreen the year round, and makes enormous plants. Can also be utilized for tubs.

Strong single divisions 25c each, \$2.50 per 12.

Larger divisions 50c, \$1.00 and \$2.50, with delivery charges extra.

# TUBEROUS ROOTED BEGONIAS

(January delivery)

Best known as pot plants, but may be used outdoors in plunged pots. Tubers are good for several years.

Rose, white, yellow, orange, scarlet and crimson.

SINGLE—Separate colors or mixed. 25c each, \$2.50 per 12.

DOUBLE—Separate colors or mixed. 35c each, \$3.50 per 12.

# ANEMONES (Spring Flowering)

(PLANT SEPTEMBER TO JANUARY)

The blossoms of the St. Caen anemones resemble poppies, the flowers are beautiful and come in a great variety of dazzling blues and reds. They flower early in the spring and make a wonderful carpet for a bed or border.

Plant the bulbs, after soaking them overnight, 1 inch deep and 6 inches apart.

	Doz.	100

**NERINE SARNIENSIS**—See under Nerine, page 31.

## CANNAS

Cannas have always been in demand and now with the wonderful new colorings and the improved size of flowers, they are even more popular. The large, handsome, ornamental foliage and beautiful spikes of bright flowers make the cannas ideal for mass plantings, backgrounds, borders or hedges. They may now be obtained in heights varying from 3 to 6 feet, and in colors of rose, red, orange, to pure white. Also some foliage is bright green and some a rich bronze. These new orchid flowering and large truss varieties bloom freely for six to eight months. In mild climates they are evergreen, but we recommend cutting away the old stalks in the winter to make room for the new growth. They should be separated every three years. Set the roots 12 to 15 inches apart. They flower more freely in sunny situations but grow well in partial shade, requiring at all times plenty of moisture.

# CANNA BEDS

## Planting Suggestions

Before laying out a Canna bed, spade the ground two feet deep, mixing thoroughly into the soil enough well rotted stable manure to fill six inches in depth of the whole bed. When ready place a stake in center of the bed and with a radius of eighteen inches mark a line for planting the first row. Set the plants in this row eighteen inches apart. Lengthen the radius eighteen inches for each successive row; plants other than Cannas require different distances. All numbers below represent round beds.

Plant 1 in the center, 6 in the first circle, 12 in the second circle then 18, 24, etc., according to the size of the bed with the circles, and the plants in the circles 18 inches apart. A bed 4 feet in diameter takes 7 Cannas; a 7-foot bed, 19 Cannas; a 10-foot bed, 37 Cannas; a 16-foot bed, 91 Cannas.

## New Offerings

	Each	Doz.	100
AMERICAN BEAUTY—5 ft., richest color we know, oriental carmine, large flowers .....	.30

MACULATA—The ivory white calla, with spotted foliage .....	.25	2.50

## DAFFODILS

PLANT OCT.-DEC.—FLOWERS FEB.-MARCH

To briefly explain the words Narcissus and Daffodil—Daffodil is the English name for a large family of plants and Narcissus is the Latin name; in other words, they are the same thing.

However, custom has decreed that they do not mean the same thing, hence the confusion.

The word Narcissus is generally confined to the pure white petaled division like the Poeticus and to the bunch flowered varieties like the paper white. All others are in popular language Daffodils.

We list only the better and the newer varieties. They bloom in March. For outdoor planting, set before December in rich ground four inches below the surface and four to six inches apart.

## LARGE TRUMPET DAFFODILS

	Each	Doz.	100
EMPRESS—Bi-color, late .....	.15	\$1.50	\$12.00

GRAND MONARQUE—White, prim- rose cup .....	.10	1.00	7.50

# FREESIAS

(For delivery until October 1st)

Although the culture of Freesias is simple and easy, there is a drawback in that the bulbs have a habit of going on strike. You may plant a nice young bulb which looks the picture of health, which for a whole twelve months gives no signs of life and then starts to grow as if nothing had happened.

The variety most known is the white Freesia Purity, the one grown at Santa Cruz for commercial purposes. We are offering this season some decided acquisitions of merit, with strong branching stems.

	Doz.	100
PURITY—Finest and purest white variety, large flower and of strong growth.....	.30	\$2.00
BUTTERCUP—Large yellow with deeper throat....	.75	6.00
SPLENDENS—Large flower, lavender violet, strong grower .....	.75	6.00

JUNE MICHELSON—Deep rose pink with blush throat, three lower petals are veined purplish crimson with deep yellow blotch on center petal. Good stiff stem.....	2.00	10.00
OLIVETTE—Bright carmine red with light yellow throat, lower petals having deep yellow throat with crimson veins.....	2.00	10.00
GENERAL PERSHING—Yellow and pink.....	.75	6.00
YELLOW PRINCE—Fine long stem orange.....	2.00	10.00
RAINBOW MIXTURE—All colors.....	.40	3.00

# HYACINTHS

PLANT OCTOBER-DECEMBER—FLOWER IN MARCH

Hyacinths are very fragrant and come in a great variety of colors. They make a magnificent display when grown outside in a bed. They are also very satisfactory when grown in pots or in glasses of water. We are listing the single type only, as they are far superior to the double, and more certain to bloom. For outdoor culture set the bulbs so that the tops will be 3 to 4 inches below the surface and 6 to 10 inches apart. For pot culture use a 4-inch pot for a bulb or a large pot for 2 or 3 bulbs, and leave the tops of the bulbs just above the surface. After potting give a good watering and set away in a cool place and cover with coal ashes or sand until thoroughly rooted, which takes from 8 to 10 weeks. During this time do not allow them to become dry. They may then be set in a cool, light place until the flower spikes have developed, when they may be placed wherever they are wanted.

Due to the exceedingly high prices on hyacinths we omit the named varieties, advising our patrons to use the bedding size.

## BEDDING HYACINTHS

These are good strong bulbs, imported direct from Holland, and will produce fine flowers. Exceptionally fine for bedding in mass effect.

## MIXED SHADES

Bedding size, 14-16 cm., 15c each, \$1.50 per 12.

Miniature size, 12-14 cm., 10c each, \$1.20 per 12.

Light blue shades, mixed.

Dark blue shades, mixed.

Dark red shades, mixed.

Rose and pink shades, mixed.

White shades, mixed.

Yellow shades, mixed.

All colors, mixed.

# SPANISH AND HOLLAND IRIS

(Plant During September)

(FLOWER TIME—APRIL-MAY)

One of the most satisfactory varieties of Iris to grow, being particularly hardy. The flowers are of great beauty, having many different blendings in color, and if cut when in the bud will last a long time in water. For best effect they should be planted in clumps or masses of from 25 to 100 or more bulbs, set 6 inches apart and 2 to 3 inches deep. They grow 18 to 24 inches high and bloom from the end of March on through June.

(These should be planted during September. Orders should be booked early, and we will not supply after September 30th. All orders booked subject to crop production.)

## SPANISH IRIS

	Each	Doz.	100

### MIXTURE OF HOLLAND AND SPANISH IRIS

	Doz.	100
ALL COLORS IN MIXTURE .....	\$ .60	\$4.50

## SUSIANA MOURNING IRIS

This is a very beautiful and quaint Persian variety growing about 18 inches tall and blooming in April and May. The large flowers are chocolate light gray veined with a network of chocolate lines. The rhizomes should be set 3 inches deep and 12 inches apart. Stock very limited this season.

Strong roots. Price \$1.00 each.

## IRIS PAVONIA

The true Peacock Iris from Cape Colony and botanically known as *Moraea Glaukopis*, *Moraea* being the African representative of the Iris. While of a fragile nature, this variety is well worth the while in your garden—a wonderful white iris with segments the size of a quarter dollar with a blue spot at the base like a Peacock eye. Stock is very scarce in America.

Strong corms, 15c each, \$1.00 per dozen

## GERMAN IRIS

These are all sun-lovers, and delight in a warm, well-drained situation, where the surface-creeping rhizome can get a good baking in summer. They will thrive in almost any soil or situation except a wet one, which causes the rhizomes to decay rapidly. This is the group best known and most commonly cultivated. The flowers are the true *fleur-de-lis*, and they are well called the "orchids of the garden," for they fairly out-rival the orchids in delicacy of structure and wide range of coloring, including rich yellows, soft blues, intense purples and claret-reds, beautiful bronzes and pure whites, in every conceivable combination.

**CULTURE**—A dry, sunny location suits them best. In wet places they are likely to decay. They may be planted in early spring, but the most favorable time is during August and September, the earlier the better, as that is their dormant season, after which they make a root growth, becoming established before winter. Nearly all Irises may be divided and replanted immediately after flowering if the roots are not allowed to become dry.

	Doz.	100
TURBAN d'OR—Orange .....	.75	6.00
ROMANO—Brilliant scarlet .....	.75	6.00

# DARWIN TULIPS

PLANT OCTOBER-DECEMBER—FLOWER APRIL

Darwins are the most satisfactory of all Tulips. They are stately in appearance, attaining a height of 24 to 30 inches, and producing beautiful globular flowers of heavy texture in a large range of colors. They bloom in April and May and are unsurpassed for bedding and cutting.

Tulips can be planted from October till late in December. They require a moderately rich soil, which should be well drained. If the soil is in poor condition use a little bone meal or well rotted manure. Plant the bulbs 6 or more inches apart and set the tops 3 inches below the surface. If the soil is heavy, place a small quantity of sand at the base of each bulb. They will remain in bloom for a longer period of time if planted in a light, shaded location.

	Each	Doz.	100
BARONNE DE LA TONNAYE—Bright rose, margined lighter.....	.10	.65	\$4.50

### COLLECTION OF TULIPS

One each of 25 varieties, all different, packed in a neat box .....	\$2.00
--	--------

## SNOWFLAKES

(*Leucojum Vernum*)

These are similar to Snowdrops, but of stronger habit. The flowers are white, tipped with green.

Plant 3 inches apart in good rich soil, 3 inches deep. May be left in the ground for several years.

10c each. Per 12 75c. Per 100 \$4.50

## SPARAXIS

Plant October-December—Blossom March to April.

Beautiful flowers borne on graceful spikes; colors of the brightest shades. They are tigereed, blotched, spotted, streaked and flushed. Plant like baby gladioli.

	Each	Doz.	100
TRI-COLOR .....	\$ .10	\$ .50	\$3.75

## TRITONIA

Plant September-March—Blossom April.

We have always listed this bulb under LAPEYROUSIA, but other seed stores list it under this name. It is often called the flame-colored freesia or the pink freesia.

	Doz.	100
Strong bulbs .....	\$ .50	\$3.50

## WATSONIA

Watsonias are similar to gladioli and are in bloom from May on. The spikes grow from 3 to 4 feet tall, and bear many stalks of gladioli-like flowers. They thrive best in a sunny location. Plant the bulbs 3 inches deep and 8 inches apart.

	Each	Doz.	100

SALMON PINK—Cerise .....	.20	2.00	12.00
LAVENDER .....	.20	2.00	12.00

# SWEET PEAS

## PLANT MORE SWEET PEAS

Sow sweet pea seed in November and December for early spring flowers. The soil for sweet peas should be rich and deep. Prepare the ground by giving a liberal dressing of well-rotted manure and bone meal. Sow the seed thinly 1 inch deep and thin out to 6 inches apart, as flowers will not be large if too crowded.

## WINTER FLOWERING VARIETIES

These varieties have the large ruffled blossoms of the Spencer type and the early flowering habit of the Winter Sweet Peas. They will commence flowering from four to six weeks earlier than the regular Spencer type and remain in bloom for a long season.

We offer this assortment of varieties as being the best in their respective classes, and containing as wide a range of color as possible.

EARLY ALL WHITE—White

EARLY AMETHYST—Royal purple.

EARLY ASTA OHN—Lavender suffused mauve.

EARLY AVIATOR—Crimson.

EARLY BLANCHE FERRY—Pink and white.

EARLY BLUE BIRD—Violet blue.

EARLY COLUMBIA—Salmon rose standard white wings.

EARLY CREAM—As named.

EARLY FAIR MAID—Blush pink.

EARLY FIRE KING—Orange scarlet.

EARLY GLITTERS—Cerise.

EARLY GRENADIER—Dazzling scarlet.

EARLY HARMONY—Lavender.

EARLY HEATHER BELL—Mauve lavender.

EARLY HERCULES—Rose pink.

EARLY ILLUMINATION—Salmon cerise.  
EARLY LAVENDER KING—Lavender.  
EARLY LIBERTY—Large crimson.  
EARLY MEADOW LARK—Cream.  
EARLY MELODY—Rose pink.  
EARLY MORNING STAR—Orange pink salmon.  
EARLY MRS. A. A. SKATCH—Deep pink.  
EARLY ROSE CHARM—Bright rose.  
EARLY ROSE QUEEN—Rose pink.  
EARLY SNOWFLAKE—Pure white.  
EARLY SONGSTER—Lavender.  
EARLY SPRING MAID—Light cream pink.  
EARLY YARRAWA—Bright rose pink.

PRICE—Any of the above, 15c a package, 50c per  $\frac{1}{2}$  oz.

COLLECTION of a packet each of 10 varieties.....\$1.00

EARLY FLOWERING ORCHID MIXTURE—A beautifully balanced mixture made up of named sorts, 10c per package; 50c per ounce; \$1.50 per  $\frac{1}{2}$  lb.

## SPENCER SWEET PEAS

Best 12 Standard Varieties of Spencer Sweet Peas.

BLANCHE FERRY—Extra select, red and white.  
CONSTANT HINTON—Mammoth white B. S.

THE PRESIDENT—Dazzling orange scarlet.  
VALENTINE—Bluish pink.  
PRICE—Any of the above, per package, 10c; 40c per oz.; \$1.25 per  $\frac{1}{4}$  lb.

RAINBOW COLLECTION—15 varieties.....	\$1.00
GARDEN COLLECTION—7 varieties.....	.50

Gold Medal Mixture Spencer Sweet Peas, per package, 10c; per oz., 20c; per  $\frac{1}{2}$  lb., \$1.25.

# ZINNIA SEED

## NEW GIANT DAHLIA FLOWERED ZINNIAS.

A superb strain of giant flowered Zinnias, originated by John Bodger & Sons Co., California, a few seasons ago. Remarkable not only for their free blooming qualities, but their magnificent range of colors. They vary from purest white to dark crimson and purple, with innumerable intervening odd shades, of terra cotta, salmon and golden yellow. The blossoms are not only of immense size, but are quite distinct in form to any other strains of Zinnias grown at the present time. The petals are exceedingly broad and beautifully channeled, which reminds one of Dahlias, rather than Zinnias, hence the name of the strain.

Blossoms are simply enormous as to size—5½ to 6-inch blossoms being quite common. The plants are of sturdy growth and blossom without intermission from early summer until late autumn.

**Per Packet, 25c; 5 for \$1.00.**

**EXQUISITE**—By far the most pleasing. A true dahlia flowered color, light rose with center a deep rose (Tyrian Rose).

**ILLUMINATION**—Similar to Exquisite but a striking color of self rose.

**CRIMSON MONARCH**—By far the largest and best of the red shades. Flowers often 8 inches in diameter.

**GOLDEN STATE**—Rich cadmium yellow, yellow in the bud, turning to an attractive orange when in full bloom.

**ORIOLE**—The most beautiful of its class. An immense orange and gold bi-color, changing slightly as it ages.

**SUNRISE**—A combination of pleasing apricot shades changing to buff as it ages.

**SPECIAL MIXTURE**—A well blended mixture containing all the above and many other novelties. A wonderful assortment.

**Price per pkt., 25c each.**

## PICOTEE TYPE

The Picotee Zinnia differs from other types in that each petal is outlined by a contrasting color which harmonizes with the body of the flower. The form and color range are similar to the Giant and Pumila types. They are useful to provide variety in that portion of the garden devoted to Zinnias, but they are especially adapted for use as cut flowers. They reproduce about 70% true.

**GOLDEN PHEASANT**—Gold ground tipped with maroon.

All Colors, Mixed, including new colors from white to scarlet.

## QUILLED TYPE

**CHOICE MIXED**—Including several new colors; this variety has been greatly improved in size and range of color this year.

### ZINNIA SPECIAL

Any 5 packets.....	\$1.00
Any 8 packets.....	1.60
All 10 packets.....	2.00

## LINCOLNS BEAUTY ASTERS

Plants about two to three feet high, of branching habit, commencing to bloom in early September and lasting until destroyed by frost. Flowers large, borne on long and stout stems, from 18 to 24 inches. The most desirable variety for cut flowers.

**CARMINE ROSE.**

**LAVENDER**—Light grayish lavender.

**PURPLE.**

**ROSE**—Pleasing bright rose.

**SEPTEMBER BEAUTY**—Delicate flesh pink.

**WHITE BEAUTY**—Giant white.

15c per pkt. The six for 75c.

## ESCHSCHOLTZIA

This beautiful and brilliant annual has been greatly improved in recent years as a result of the painstaking efforts of the hybridizers, and we now offer a COLLECTION of many BEAUTIFUL AND UNUSUAL COLORS.

	Pkt.

COLLECTION of 6 varieties in neat packet..... 50 cents

## GRASSES FOR LAWNS

Grass seed for lawns may be planted in the fall or in the early spring. Use every effort to have ground in best of condition before sowing. Prepare soil well and after sowing the seed sprinkle with bone meal, and rake seed in lightly, and roll down but not too tight. If weather is warm, it is advisable to mulch with straw. Keep wet. Use one pound of seed to 200 square feet except clover, then use one pound to 300 square feet. It pays to plant thick.

Each fall with the first rains, try applying bone meal, blood and wood ashes dusted over your lawn. Regular periods of rolling will improve its appearance.

**KENTUCKY BLUE GRASS**—A wonderful lawn maker where conditions are right. Requires plenty of water, warmth and care.

**WHITE CLOVER**—Extra dwarf recleaned.

**PACIFIC RYE**—Suitable for sandy soils.

**EVERGREEN LAWN MIXTURE**—A well balanced mixture of necessary grasses to meet all conditions. Highly recommended.

# FERTILIZERS

There is an available plant food for every demand of nature and we carry a complete stock of all the necessary elements and mixtures for garden use.

## ELEMENTS OF FERTILITY

**NITROGEN:** Ammonia is the equivalent term for nitrogen. It produces leaves and stalks and gives vigor to the plant. Stunted plants, spindling stalks, and pale green leaves plainly indicate that additional available ammonia is needed.

**PHOSPHORIC ACID:** Phosphoric Acid is the plant food element that develops root system, hastens maturity, makes plump, heavy kernels, solid corn, large cotton bolls and gives strength and productive power to the plants.

**POTASH:** Potash stiffens straw and stalks, promotes cellular growth and aids in starch formation.

When any one plant food element is deficient in the soil, biggest yields of best quality cannot be grown. The lacking plant food should be supplied in available form and from a high-grade source.

**IMPORTANT:** If your land is sour, we recommend sweetening with lime several weeks before applying fertilizer.

**FOR BULBS:** We suggest mixing bone flour with ground before planting, and blood to induce top growth.  
We would be pleased to advise you in the use of fertilizers.

As prices are dependent on cost of raw products in open markets, price list of fertilizers will be furnished on request.

"Say it with flowers"  
**GROW BULBS**

Santa Cruz Printery
